C13: API_post_post

Type	Priority	Estimate	References
Performance	High	None	None
Automatization_type			
Cypress Framework			

Preconditions

Website access
Cypress framework (v13.13.0)
Node.js (v10.8.1)
VisualStudioCode (v1.91.1)
Web browser: Google Chrome
Operating System: Windows 10

Steps

1. Send a POST request to the endpoint https://jsonplaceholder.typicode.com/posts/1.
2. Verify the response status is 201.

Script:
```
describe("HTTP request", () => {

it("Post call", () => {
    cy.request({
        method: 'POST',
        url: 'https://jsonplaceholder.typicode.com/posts/1',
        body: {
          title:"Test post",
          body:"This is post call",
          UserId:5
        }
    })
     .its('status')
     .should('eq', 201);
  })

})
```

Expected Result

Post id.1 is posted.
Response status is 201 OK
